Office Action Summary	Application No. 10/815,977	Applicant(s) KRUPKE ET AL.	
	Examiner Joseph C. Rodriguez	Art Unit 3653	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Claims 11-13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected claim grouping, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/23/2005.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Krupke et al. (See entire article published in Science July 18, 2003).

Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15. Here, it is further noted that the European search report provided on 11/23/05 was not listed on the information disclosure statement submitted therewith and an English translation of the European search report, as well as the other previously submitted foreign patent office documents, has not been provided.

Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated by Krupke et al. ("Krupke")(See article published in Appl. Phys 2003; published online Oct. 28, 2002).

Krupke teaches utilizing a dielectrophoretic cell comprising two electrodes (Fig. 1, p. 398 describing electrodes creating a non-uniform electric field) and a liquid dielectric (DMF which is known to have a high dielectric constant) to separate metallic carbon nanotubes from semi-conducting carbon nanotubes (p. 397 teaching that bundles of nanotubes include either metallic and semi-conductive nanotubes and that bundles are separated).
